THE DAILY CARMELITE

VOL. IV NO. 20-1 CARMEL-BY-THE-SEA: FRIDAY, JUNE 26, 1931 OFFICIAL PAPER 3c

ON PAPER WINGS

Exclusive in The Daily Carmelite

by . . . FREDERICK O'BRIEN

REV. CLARENCE WILSON, religious head of probishn, visiting San Francisco, praised the city's sobriety. "No drunks!" he said, unctiously. He is preaching the new-dry gospel, called "The Sacred Thirst." "We Christians will never allow beer or light wines," he said. Which means, sadly, dynamic gin and moon will continue to hurt us. Christ, what idiocy in Thy sacred name!

¶ ¶

IN the Philippines, three hundred alleged communists are arrested by the War Department of Hoover. Lenin's shadow lengthens over the world.

¶ ¶

BUCHMANISM sprouts strongly as a religious defense against the emptiness of modern life. It appeals to more sophisticated folks than Christian Science, Episcopalians are its main hold. Examine it! Perhaps, you'll find a glimpse of God.

¶ ¶

LOS ANGELES bootleggers are to present their Mayor with a patriotic memento, for not drinking abroad. Drink where you live.

¶ ¶

THE smaller the town, the dirtier the stories. One of the Romans' reasons for despising the pagans (peasants) was the filth of their language. I was struck by this, recently. Searching for some sound sherry, I went with a friend to a nearby town of ten thousand, and interviewed a police chief, a man in his sixties. "A great wit" said my friend. "His stories are famous." My friend had recollections of the chief when my friend was a boy. Getting the information, the chief was flattered by a compliment for his story gift, and polluted the ether with the most senseless, vile, did-you-hear-this-one anecdotes possible; without other point than foul endings. One might live a year in New York or San Francisco, and not hear the like. He was noted, he said, for telling his stories before intimate sessions of the social orders to which he belonged. All of which begin their sessions with prayer.

Half-Way Justice: A Post-War Wrong Unrighted

Because of reference to a Carmel citizen, The Daily Carmelite takes pleasure in reprinting excerpts from an article by Bainbridge Colby (Robert Lansing's successor as Secretary of State) in yesterday's San Francisco "Examiner."

For every wrong there is a remedy, says the law, and for every injury there exists some measure of redress. But it does not always work out so.

Take the case of a man falsely accused. He is put on trial. After a long period of mental suffering, and at great exertion and expense, he disproves the charge made against him. Has he any redress for what he has suffered at society's hands? Absolutely none, and he may count himself fortunate that he had the money to lose which was required for his defense. . . . .

It should nevertheless be a point of honor with all men, and particularly those occupying public station and weilding the power requisite to make amend for such injuries, to be watchful and alert, that no opportunity shall escape to undo such wrongs.

It was this feeling which prompted the outburst of praise for President Hoover when he recently nominated Benedict Crowell, former Assistant Secretary of War, to be a brigadier-general in the reserve corps of the United States Army. It will be remembered that Mr. Crowell and several others were indicted at the instance of the Harry Daugherty regime in the Department of Justice. They were charged with fraudulently conspiring to obtain control of the emergency construction program for their own gain and for that of friends.

When the indictment came before the court, it was indignantly expunged as wholly unsupported by facts or credibilities. . . .

Praiseworthy as the President's course was, the duty of honorable amends has only partly been performed.

Included in the Crowell indictment, and a victim of the same political malice, was Colonel William A. Starrett, known throughout the country as an engineer of high distinction and scientific builder of unequalled achievements in his profession . . . ;Mr. Morton C. Tuttle, a trustee of Dartmouth College and long an influential and respected figure in the engineering world; and Mr. Clair Foster of Carmel, California, a talented scientist in the field of radio research and for many years an outstanding figure in the field of large scale building and construction. They also were named in this infamous indictment.

Probably these gentlemen are not particularly desirous of advanced military rank. Their lives have been spent and their recognition has been won in civil life.

But this is a secondary matter. There are such things as Distinguished Service Medals, which carry honor when deservedly bestowed, and there are many other ways to do justice handsomely at the command of a President of the United States. . . .

Befogged Stranger

An unfortunate case came to the attention of Marshal Englund Wednesday night, resulting in the detention of an elderly man at Salinas for observation. Well-dressed and not of a transient type, the man was observed in the business district late at night acting in an unbalanced manner. When questioned by Chief Englund, his answers were incoherent, suggestive of amnesia; he could or would tell nothing about himself, aside from giving a name.

Water appeared to be his obsession; constantly he repeated the word. Chief Englund endeavored again yesterday morning to solve the riddle; making no headway, he took the man to the county hospital.

Personalia

EDITED BY S. L. H.

Miss Calista Rogers, who is giving a recital Saturday evening at the Denny-Watrous Gallery, her accompanist, Ralph Linsley, and Miss Margaret Tilly, pianist, are the week-end guests of Mr. and Mrs. Frank Wickman at the Highlands. Among the parties given in their honor was a dinner Wednesday evening given by Miss Ada Howe Kent and Mrs. Margaret Kilpatrick, and a tea yesterday afternoon at the home of Mrs. I. L. Ettlinger in the Highlands.

Miss Mary Trevett, daughter of Mr. and Mrs. S. A. Trevett, has arrived from New York to spend the summer with her family at their home in Hatton Fields.

Mr. and Mrs. Hollister McGuire of Piedmont were the guests of Mr. and Mrs. Elliott Durham on Wednesday.

Dr. Amelia Gates entertained Miss Mabel Vernon and Miss Mildred Scott Ohmstead, members of the W. I. L. Caravan, during their stay in Carmel.

Miss Elizabeth Ulman, San Francisco, is spending two weeks in Carmel with Miss Ann Wolcott.

Mrs. Joseph Halle Shaeffner of Chicago, who has been visiting her mother, Mrs. Grace Boke, left early this week to join Mr. Schaeffner for a trip through Canada, with visits to Banff and Lake Louise.

Mr. and Mrs. Charles Berkey of the Bank of Carmel, who have been spending two weeks at Wanana, near Feather River, are expected home today.

Mrs. William S. Post, her daughter, Miss Peggy Post, Mrs. Harry Smith, and her son, Ensign Harry Smith, of the U. S. S. Texas, have taken a cottage on North Casanova for several days.

Among those who have come down from San Francisco for the Calista Rogers recital are Mrs. Marcus Koshland, Miss Baronio, Mrs. Pipes and Margaret Tilly.

Metz Durham announces that Miss Billy McConnell, well-known Monterey dancer, is helping in next week's production of "Yes, Doctor," by not only doing solo work, but adding several new touches to the work of the choruses. The Misses Ann and Louise Cunendet, blond twins from Paso Robles, have arrived to join the cast.

SUMMER FESTIVAL OF MUSIC

Tuesday evening, June thirtieth, the Brosa Quartette will appear in the second recital of the Summer Festival of Music at the Studio Theatre of the Golden Bough.

A Mozart Quartette will be followed by one of Brahms and then will come the first contemporary work performed by this group, "Rispetti e Strambotti," by Malipiero, considered as among the outstanding works of the Italian composer. In 1920 the Coolidge Prize, open to composers of all nations, was awarded Malipiero in recognition of this valuable contribution to musical literature.

The Los Angeles program carried the following regarding this work:

"Divided into short movements, each is complete in itself; the whole, however, is animated by a spirit which gives it a characteristic individuality. 'Rispette e Strambotti is made up of twenty short phrases joined together by rapid progressions of chords that lend a peculiarly incisive quality to this work. Apart from the form which is perfectly suited to the matter the chief characteristic of this quartette is its sonorous quality. The various sections, as just mentioned, may stand by themselves independently, and yet each episode proceeds inevitably to the next. A chain is thus formed, natural and spontaneous, that gives unity to the composition, while a richness of melody and an infinite variety of rhythm burst forth with joyous and unrestrained emotion."

The few available single seats for this concert are placed on sale at the box office opposite the post office which will be open Friday, Saturday, Monday and Tuesday from two to five p. m.

CALISTA ROGERS RECITAL

The recital of Calista Rogers, soprano, in the Denny-Watrous Gallery Saturday and Sunday evenings is interesting a large number of people.

Calista Rogers springs from a long line of musicians, and the informal musical gatherings which were a regular thing in her parent's home brought her in contact with musical gatherings at an early age with most of the important figures in music and art. As a child she studied both violin and piano, but gradually it was discovered that she had a beautiful voice, so all other instruments were abandoned for vocal study. Calista Rogers' father was the well-known London music publisher, Winthrop Rogers. After his death, the young girl was for three years the head of the business, and this interruption in her career gave an added maturity and thoughtfulness to an already established identity.

RESOLUTION NO. 505

RESOLUTION OF INTENTION

RESOLVED, that it is the intention of the Council of the City of Carmel-by-the-Sea, County of Monterey, State of California, to order the following work to be done and improvements to be made in said city as follows, to-wit:

(A) That Mission Street, from the southerly line of Ocean Avenue to the southerly line of Eighth Avenue, including all street and alley crossings, terminations and opposite terminations be improved as follows:

1. By grading the roadway area of the above mentioned and described portion of Mission Street between curb lines, i. e., seventeen (17.0) feet on each side of the center line of said Street, to the subgrade and cross sections shown in the plans and specifications hereinafter mentioned and referred to.

2. By constructing monolithic hydraulic cement concrete curbs and gutters on each side of the above mentioned and described portion of Mission Street; the lines of the tops of said curbs nearest to center line of said street to be seventeen (17.0) feet on each side of said center line, and dimensions and thickness of said curbs and gutters to be as shown and delineated in the plans and specifications hereinafter mentioned and referred to.

3. By paving the roadway area of the above mentioned and described portion of Mission Street between gutters, i. e., fifteen feet and eight inches (15' 8") on each side of center line of said Mission Street, with a water bound pavement consisting of local quarried material of a character described in the plans and specifications hereinafter mentioned and referred to.

4. By constructing within the area of the above mentioned and described portion of Mission Street six (6) hydraulic cement concrete catch basins with cast iron frames and gratings at the places hereinafter mentioned, viz:

(a) Two such catch basins to be constructed along the easterly curb line of Mission Street, one at the northerly property line of Seventh Avenue and one at the northerly property line of Eighth Avenue.

(b) Two such catch basins to be constructed along the westerly curb line of Mission Street, one at the northerly property line of Seventh Avenue and one at the northerly property line of Eighth Avenue.

(c) Two such catch basins to be constructed along the westerly property line of Mission Street, one at the southerly curb line of Seventh Avenue and one at the southerly curb line of Eighth Avenue. The particular locations and dimensions of said catch basins being more fully shown in the plans and specifications hereinafter mentioned and referred to.

5. By constructing within the area of the above mentioned and described portion of Mission Street two (2) hydraulic cement concrete manholes with cast iron frames and covers at the locations hereinafter mentioned, viz:

(a) One such manhole to be constructed at the intersection of a line parallel to and twenty (20.0) feet southerly from the northerly property line of Seventh Avenue with a line parallel to and twenty (20.0) feet westerly from the easterly property line of Mission Street.

(b) One such manhole to be constructed at the intersection of a line parallel to and twenty (20.0) feet southerly from the northerly property line of Eighth Avenue with a line parallel to and twenty (20.0) feet westerly from the easterly property line of Mission Street. The particular locations and dimensions of said manholes being more fully shown in the plans and specifications hereinafter mentioned and referred to.

6. By installing within the area of the above mentioned and described portion of Mission Street six (6) full circle, galvanized, corrugated iron pipe culverts, each ten (10") inches in diameter, at the location hereinafter mentioned, viz:

(a) Three (3) such pipe culverts to be installed, one leading in a direct line from each of the hereinabove mentioned and described three (3) catch basins at the crossing of Mission Street and Seventh Avenue, to connection with the manhole at said crossing.

(b) Three (3) such pipe culverts to be installed, one leading in a direct line from each of the hereinabove mentioned and described three (3) catch basins at the crossing of Mission Street and Eighth Avenue, to connection with the manhole at said crossing. Said pipe culverts installations being more fully shown in the plans and specifications hereinafter mentioned and referred to.

7. By installing within the area of the above mentioned and described portion of Mission Street, full circle, hydraulic cement concrete storm sewer pipes of the sizes and at the locations hereinafter mentioned, viz:

(a) A line of said concrete pipe twenty-four (24") inches in diameter to be installed and laid in a direct line from a point in the easterly property line of Mission Street that is twenty (20') feet southerly from the northerly property line of Seventh Avenue, to connection with the hereinabove mentioned and described manhole at the crossing of Mission Street and Seventh Avenue.

(b) A line of said concrete pipe twenty-four (24") inches in diameter to be installed and laid in a direct line connecting the two hereinabove mentioned and described manholes, the one at the crossing of Mission Street and Seventh Avenue and the one at Mission Street and Eighth Avenue.

(c) A line of said concrete pipe thirty (30") inches in diameter to be installed and laid in a direct line from connection with the hereinabove mentioned and described manhole at the crossing of Mission Street and Eighth Avenue to a point in the southerly property line of Eighth Avenue that is twenty (20') feet westerly from the easterly property line of Mission Street.

(B) That Seventh Avenue, from the easterly property line of San Carlos Avenue to the westerly property line of Mission Street; Eighth Avenue, from the easterly property line of Dolores Street to the westerly property line of San Carlos Avenue, and Eighth Avenue from the easterly property line of San Carlos Avenue to the westerly line of Mission Street be improved as follows, to-wit:

1. By grading the roadway areas of the above mentioned and described portions of Seventh Avenue and Eighth Avenue between curb lines, i. e., seventeen (17.0) feet on each side of the center lines of said Avenues, to the subgrade and cross sections shown in the plans and specifications hereinafter mentioned and referred to.

2. By constructing monolithic, hydraulic cement concrete curbs and gutters along the northerly sides of the above mentioned and described portions of Seventh Avenue and Eighth Avenue; the lines of the tops of said curbs nearest to the center lines of said Avenues to be seventeen (17.0) feet from said center lines, and dimensions and thickness of said curbs and gutters to be as shown and delineated in the plans and specifications hereinafter mentioned and referred to.

3. By paving the roadway area of the above mentioned portions of Seventh Avenue and Eighth Avenue between gutters, i. e., fifteen feet and eight inches (15' 8") on each side of center lines of said Avenues, with a water bound pavement consisting of local quarried material of a character described in the plans and specifications hereinafter mentioned and referred to.

(C) That those portions of Seventh Avenue, Eighth Avenue and Ninth Avenue, from the easterly property line of Mission Street to the westerly property line of Junipero Avenue be improved as follows, to-wit:

1. By grading a strip of the roadway area of the above mentioned and described portions of Seventh and Eighth Avenues, twenty-four (24') feet wide, lying twelve (12') feet on each side of the center lines of said Avenues, to the subgrade and cross sections shown in the plans and specifications hereinafter mentioned and referred to.

2. By constructing within the area of the above mentioned and described portions of Seventh and Ninth Avenues two (2) hydraulic cement concrete manholes with cast iron frames and covers at the locations hereinafter mentioned, viz:

(a) One such manhole to be constructed at a point twenty (20') feet southerly from the northerly property line of Seventh Avenue and one hundred five (105.0) feet easterly from the easterly property line of Mission Street.

(b) One such manhole to be constructed at a point fifteen (15.0) feet northerly from the southerly property line of Ninth Avenue and one hundred thirteen (113.0) feet easterly from the easterly property line of Mission Street. The particular locations and dimensions of said manholes being more fully shown in the plans and specifications hereinafter mentioned and referred to.

3. By installing within the area of the above mentioned portions of Seventh Avenue and Ninth Avenue, full circle, hydraulic cement concrete storm sewer pipes of the sizes and at the locations hereinafter mentioned, viz:

(a) A line of said concrete pipe, twenty-four (24") inches in diameter to be installed and laid in a direct line from connection with the above mentioned manhole in Seventh Avenue to a point in the northerly property line of Seventh Avenue that is one hundred eighteen (118.0) feet easterly from the easterly property line of Mission Street.

(b) A line of said concrete pipe, twenty-four (24") in diameter to be installed and laid in a direct line from connection with the above mentioned manhole in Seventh Avenue to a point in the easterly property line of Mission Street, that is twenty (20') feet southerly from the northerly property line of Seventh Avenue.

(c) A line of said concrete pipe, thirty (30") inches in diameter to be installed and laid in a direct line from connection with the above mentioned manhole in Eighth Avenue to a point in the southerly property line of Ninth Avenue that is one hundred twenty-six (126.0) feet easterly from the easterly property line of Mission Street.

(d) A line of said concrete pipe thirty (30") inches in diameter to be installed and laid in a direct line from connection with the above mentioned manhole in Ninth Avenue to a point in the easterly property line of Mission Street that is fifteen (15') feet northerly from the southerly property line of said Ninth Avenue.

(D) That Mission Street, from the southerly property line of Eighth Avenue to the southerly property line of Ninth Avenue, including all street and alley crossings, terminations and opposite terminations be improved as follows:

1. By grading a strip of the roadway area of the above mentioned and described portion of Mission Street, twenty-four (24') feet wide, lying 12 feet on each side of the following described center line: Beginning at a point in the southerly property line of Eighth Avenue that is twenty (20') feet westerly from the easterly property line of Mission Street; thence southerly in a direct line one hundred (100') feet to a point twenty (20') feet westerly from easterly property line of Mission Street; thence southerly in a direct line fifty (50') feet to a point twenty-three (23') feet westerly from the easterly property line of Mission Street; thence southerly in a direct line fifty (50') feet to a point twenty (20') feet westerly from the easterly line of Mission Street; thence southerly in a direct line fifty (50') feet to a point twenty (20') feet westerly from easterly line of Mission Street; thence southerly in a direct line fifty (50') feet to a point thirty (30') feet westerly from the easterly property line of Mission Street; thence southerly in a direct line and parallel to and thirty (30') feet distant from the easterly property line of Mission Street to a point in line of center line of Ninth Avenue; thence easterly along center line of Ninth Avenue, thirty (30') feet to a point

in easterly property line of Mission Street. Also a strip thirty-four (34') feet wide lying seventeen (17') feet on each side of the following described center line: Beginning at a point in the center line of Mission Street and in southerly line of Ninth Avenue produced and running thence northerly along said center line of Mission Street thirteen (13') feet.

2. By paving the last hereinabove described twenty-four (24') and thirty-four (34') foot strip of roadway area with a water bound pavement consisting of local quarried material of a character described in the plans and specifications hereinafter mentioned and referred to.

3. By constructing within the area of the above mentioned portion of Mission Street one hydraulic cement concrete manhole with cast iron frame and cover, same to be located at a point twenty (20') feet westerly from the easterly property line of Mission Street and fifteen (15') feet northerly from the southerly property line of Ninth Avenue. The particular location and dimensions of said manhole being more fully shown in the plans and specifications hereinafter mentioned and referred to.

4. By installing within the area of the above mentioned and described portion of Mission Street, full circle, hydraulic cement concrete storm sewer pipes of the size and at the locations hereinafter mentioned, viz:

(a) A line of said concrete pipe thirty (30") inches in diameter to be installed and laid in a direct line from connection within the hereinabove mentioned manhole at the crossing of Mission Street and Ninth Avenue to a point in the southerly property line of Eighth Avenue that is twenty (26') feet westerly from the easterly property line of Mission Street.

(b) A line of said concrete pipe, thirty (30") inches in diameter to be installed and laid in a direct line from connection with the hereinabove mentioned manhole at the crossing of Mission Street and Ninth Avenue to a point in the easterly property line of Mission Street that is fifteen (15') feet northerly from the southerly property line of Ninth Avenue. The particular locations and dimensions for said concrete pipes being more fully shown in plans and specifications hereinafter mentioned and referred to.

(E) That Mission Street, from the southerly property line of Ninth Avenue to the northerly property line Tenth Avenue to be improved as follows, to-wit:

1. By grading a strip of the roadway area of the above mentioned and described portion of Mission Street between curb lines, i.e., seventeen (17') feet on each side of the center line of said Mission Street, to the subgrade and cross sections shown in the plans and specifications hereinafter mentioned and referred to.

2. By constructing monolithic, hydraulic cement concrete curb and gutter along the westerly side of the hereinabove mentioned portion of Mission Street; the line of the top of said curb nearest to the center line of the said Mission Street to be seventeen (17.0) feet from said center line and dimensions and thickness of said curb and gutter to be as shown and delineated in the plans and specifications hereafter mentioned and referred to.

3. By paving the roadway area of the above mentioned portion of Mission Street between gutters, i.e., fifteen feet and eight inches (15' 8") on each side of the center line of said Mission Street, with a water bound pavement consisting of local quarried material of a character described in the plans and specifications hereinafter mentioned and referred to.

NOTICE IS HEREBY GIVEN that the grades of the hereinabove mentioned and described streets have been modified, changed and established by the plans and specifications and the detailed drawings attached thereto, adopted by the Council of the City of Carmel-by-the-Sea on the 27th day of May, 1931, and as so modified, changed and established shall be the grade at (to) which said work and improvement on said streets shall be done and made, to which said plans and specifications and detailed drawings reference is hereby made for a full and particular description of said grades, so modified, changed and established as aforesaid, the same being on file in the office of the Clerk of the said City of Carmel-by-the-Sea.

All of the above described work and improvement to be done to conform to and with the grade as modified, changed and established by the plans and specifications, as aforesaid, and to the official line, and in accordance with the plans and specifications adopted therefor by the Council of said City of Carmel-by-the-Sea on the 27th day of May, 1931, which said plans and specifications are now on file in the office of the Clerk of said City of Carmel-by-the-Sea, and reference is hereby made to the same for a full and complete description of the said work and improvement and the several locations at which the same is to be made, for the modified, changed and established grades, and for further particulars.

There is excepted from the said work and improvement any and all such work already done to the official line and to the above mentioned modified, changed and established grade, and there is excluded therefrom any duplication of such work at the same place, due to the re-crossing of lines in the foregoing description of said work and improvements, it being the intention to describe only one improvement of the same kind or class at any one place.

AND WHEREAS, said contemplated work and improvement in the opinion of the Council of the City of Carmel-by-the-Sea, is of more than local or ordinary public benefit and will affect and benefit the lands and district hereinafter mentioned, which said district is hereby declared to be the district benefitted by the said work and improvement; that therefore the entire costs and expenses of said work and improvement shall be and are hereby made chargeable against and shall be assessed upon said lands and district, which said district is situate wihin the corporate limit of the City of Carmel-by-the-Sea, County of Monterey, State of California, and the said district is shown, described and delineated on that certain map or plat designated and entitled "Plat Showing Assessment District Under Resolution of Intention No. 505" which said map or plat was adopted and appproved by the Council of the City of Carmel-by-the-Sea on the said 27th day of May, 1931, and the same is now on file in the office of the City Clerk of the City of Carmel-by-the-Sea, to which said map or plat reference is hereby made for a particular description and an accurate location of the said assessment district and is made a part hereof.

The said Council of the City of Carmel-by-the-Sea further declares that all public streets, avenues, roads and public ways, contained within the district shown and described on the map or plat above mentioned, the same being in use in the performance of a public function, to-wit: as public streets and avenues, shall be omitted from the assessment hereafter to be made to cover the costs and expenses of said work and improvement.

And it is further ordered and notice is hereby given, that serial bonds to represent the unpaid assessments and bear interest at the rate of six per cent per annum, shall be issued hereunder in the manner provided by the Improvment Bond Act of 1915 as amended. the last installment of which said bonds shall mature nine years from the second day of July next succeeding ten months from their date. Assessments against the property of the City of Carmel-by-the-Sea will be paid from monies in the general fund of said City.

This Resolution of Intention is adopted under and pursuant to the provisions of those certain acts of the Legislature of the State of California designated and entitled, respectively, The Improvement Act of 1911, as amended, and the Improvement Bond Act of 1915, as amended, and further proceedings hereunder shall be taken and had in accordance with the provisions of said acts.

AND NOTICE IS HEREBY GIVEN that on Wednesday, the 8th day of July 1931, at the hour of eight o'clock p. m., of said day at the chamber or meeting place of the Council in the City Hall in said City of Carmel-by-the-Sea, are hereby and have been fixed as the time and place when and where any and all persons having any objections to the proposed work and improvement above described, may appear before said Council and show cause why said work and improvement should not be carried out in accordance with this Resolution of Intention.

Further notice is hereby given that any property owner whose property is to be assessed to pay the costs and expenses of the above described work and improvement may, at the time and place fixed herein for hearing protests against the said work and improvement, to-wit: At eight o'clock p.m. on the 8th day of July, 1931, appear before said Council and make objections to the modified, changed and established grade, as above set forth and to which said work and improvement is to be done and made.

The (Daily) Carmelite, a newspaper published and circulated in said City at least once each week, is hereby designated as the newspaper in which this resolution shall be published in the manner and form required by law. The Superintendent of Streets of said City is hereby directed to post notices of the passage of this Resolution of Intention in the manner and form required by law. The Clerk of said City is hereby directed to cause this Resolution of Intention to be published twice in said newspaper in the manner required by law.

PASSED AND ADOPTED by the Council of tbe City of Carmel-by-the-Sea, this 17th day of June, 1931, by the following vote:

AYES: Councilmen: Heron, Kellogg, Jordan, Bonham.

NOES: Councilmen: None.

ABSENT: Councilmen: Rockwell.

APPROVED: June 17, 1931
HERBERT HERON
Mayor of said City

IS KINO BAY A MYTH?

By PORTER EMERSON BROWNE

I am told that many Carmelites believe Kino Bay to be a myth. It is anything but. When Romes, New York and Italy, Athens, Greece and Georgia; and Bellows Falls, Vermont, are myths then I will be prepared to admit that Kino is. Not until. Kino Bay is an arm of the Gulf of Lower California. It is a beautiful stretch of water, twelve miles across, with a perfect beach—pure sand and no undertow. It is ninety miles northwest of Guaymas, seventy due west of Hermosillo and about a hundred and ninety below the foot-waters of the Little Colorado.

In the bay is Alcatraz Island, the greatest pelicanry in the world. Beyond that, Tiburon, the old home of the Seri Indians. And we hope it stays so. Across the bay are Santa Rosalia, the French mining town; Los Angeles and Las Animas Bays. The climate is perhaps a bit better than perfect. The water is so buoyant that a thin man with window weights on his wrists can't sink if he tries. And the density of the population is epitomized by Santo Blanco Dimph, the densest man we ever knew who, if he had four times as much sense would be almost a moron. We have three near neighbors, Juan Moreno (John Brown) his brother Antonio Moreno (Tony Brown) and old Jim Blevins, who owns Costa Rica, the finest old *hacienda* in all Sonora, twelve thousand acres, tenant farmers, what not—all naturally irrigated—the land twice a year and the farmer whenever there is a *fiesta*. Ned Sparks and I have just bought from old Jim a two thirds interest in the *hacienda*.

We are going to put it into beans, corn, alfalfa, enough wheat to make *tortillas*, and we intend to stock it with hogs and poultry. We are no one crop farmers, which is slang for gol-darn fools. For machinery we are going to have an egg-beater and a fly-swatter.. Our motto is Food First, Business Last. Our coat of arms is a fried chicken rampant on a field of mashed potatoes. Our policy is the greatest amount of food and work for the greatest number because we always did prefer machinery to people except in the case of Henry Ford.

In closing, to make everything quite clear, Kino Bay is an actual place, discovered by Father Kino in 1540, by Y. L. Holmes in 1924 and by me in 1931. It is here that lay the ship of the good father, for ten years, while he built the chain of missions—Hermosillo, Pitiquito, Carorca, Oquitoa, Magdalena, Tubatana, Tumacacori and San Xavier, extending from here to Tucson. And it is a lovely place.

The hunting takes in everything from mountain sheep to quail. The fish run from sea bass to Wall Street gamblers on a vacation. And speaking of Wall Street, at San Esteban, Fox Island, forty miles away, is the biggest sea lion rookery on the lower Pacific Coast. Why speaking of Wall Street? Well, doesn't a sea lion eat his weight in fish a day? And to tell the ultimate truth Professor Sidebottom is our manager, Professor Bachol is a figment of mortal mind, Professor Dooseleberry is a slight variant on the name of the most trying guest that ever visited Kino. The Laboratories are non-existent, as is the radio station, thank heavings. Frank Byrne is a guest. Franciasca Fontes is the table maid and, while far be it from us to slam a lady, the less said the soonest mended. The horses are well behaved.

Our leaving Kino Bay does not mean that we are forsaking our first love, this Kino Bay where Nature smiles so bountifully that we can hear our rippling mirth. It means merely that we are going to extend our activities along the well known lines of Division of Labor. At Kino we have a large (and at times dense) population living on fish. At Costa Rica they raise beans. By putting the two together, we can get a balanced diet. And, in the fall, we hope to put up little houses, and a mess hall. We figure that Americans who like to rest, read, can come and we can eat them and sleep them all for twelve dollars a week.

NOTICE INVITING SEALED PROPOSALS

Pursuant to a resolution of the Board of Trustees of the Sunset School district, County of Monterey, State of California adopted June 9, 1931, said Board of Trustees hereby invites sealed proposals, or bids, for general contract, brick and masonry, painting, plumbing, lathing and plastering, electrical work, tile, blackboards, ornamental and miscellaneous iron, mill work, heating, roofing, sheet metal work, shades, linoleum and asphalt tile, and miscellaneous items having to do with the erection of an auditorium, school rooms and alterations to the Sunset School building in accordance with the plans and specifications prepared by Swartz and Ryland and adopted by said board May 4,1931.

June 29, 1931, at 7 o'clock P. M. at said Sunset School is hereby fixed as the time and place where all bids will be publicly opened and declared.

All such bids must be submitted on a form provided by Swartz and Ryland and must be accompanied by a certified check on a responsible bank for an amount not less than ten per cent of the aggregate of the bid, and such certified check shall be forfeited to said school district for liquidated damages in the event the successful bidder shall fail or refuse for a period of five days after the award of such contract to enter into a contract with said district pursuant to the terms of such proposal or bid on file, or should fail at the time of the execution of such contract to accompany same with a bond in usual and proper form, covering material and labor upon said work in a sum of not less than 50 per cent of the amount of the contract price therefor, and by an additional bond for the faithful performance of said work in the sum of 25 per cent of such contract price: said bonds to be both in form and substance to the satisfaction of said Board of Trustees.

Said work shall be paid for as follows: 75 per cent of the value of the work done each month to be paid on or before the seventh day of the succeeding month and the balance of 25 per cent of the value of each month's work to be paid for thirty-five days after the completion and acceptance of said work; each of said payments to be conditioned upon the written approval of said work by Swartz and Ryland.

The Board of Trustees reserves the right to reject any and all such bids and also to waive any informality in any bid received which in their opinion complies specifically with their requirements.

Copies of plans and specifications setting forth in detail said general contract, brick and masonry, painting, plumbing, lathing and plastering, electrical work, tile, blackboards, ornamental and miscellaneous iron, mill work, heating, roofing, sheet metal work, shades, linoleum and asphalt tile, and miscellaneous items may be obtained from Swartz and Ryland, Architects and Engineers, 206 Spazier Building, Monterey, upon deposit of $25.00.

Dated: June 9, 1931.

Frederick Bigland.

Consider the Facts

—*with* HAZEL ZIMMERMAN, *Investment Authority*

Early in 1929 we as a people were of the opinion that the stock market had no top, because our optimism had been carried to an extreme. During these weeks the public has made a similar mistake, pessimism has been so dark-hued that many refuse to believe that the market had a bottom, or if they did believe it, they believed that they would be smart enough to catch it on the buying side. The announcement that the administration had initiated plans to assist economic recovery both here and abroad electrified the entire market on Saturday morning and resulted in a complete routing of the "bears" and a very definite routing of pessimism. During a two hour session the volume of trading exceeded any full session of the week with a strong upswing that took many issues into new high ground for the movement, both industrial and public utility averages getting into new high territory. A two-hour rally powerful enough to regain all ground lost within the past month and to enter new high ground for the recovery is the most convincing proof in the world, both in the change of character of the market itself and of a very definite change in sentiment.

Of interest to investors is the type of leadership that the market brings forward as strength is evidenced. American Telephone and Telegraph has leadership of the utilities and United States Steel for the industrials.

There is a time when it is wasteful to save money, and that time is with us. In the first place hoarded money has never accomplished anything constructive until it is put into circulation. A thousand acre tract of land planted to the best of crops might be lost from drouth with a ten thousand gallon tank of water in the next field. That water would have to be released and put to use to benefit the situation. Just so, money hoarded in savings banks means curtailed expenditures, which in turn means curtailed business, which in turn results in curtailed earnings, low stock prices, and gets right back in its vicious circle to curtailed expenditure. For instance, let us say that an article of clothing you know you are going to need would have cost you $75 last year, and is available today for $45. Your dollar has grown while prices have gone down, and to refuse to purchase that article at $45 with the definite knowledge that you are going to have to pay $75 within the coming months for that article, means $30 wasted through saving at the wrong time.

* * *

The merchants of your community can benefit from low prices if their volume of business increases proportionately. You can benefit from low prices as you put your dollars to work for you now, they will never buy more for you at a lower cost. One hundred and one million shares were sold on the New York Exchange during April and May, and one hundred and one million shares were therefore bought at the same time. Four hundred and sixty seven dollars worth of securities changed hands at ridiculous levels. Who is going to be most benefitted, the buyer or seller? With even the few weeks evidence that has come to light in the short time that has elapsed, the buyer has all of the best of the picture. Stocks have passed from weak hands, from the hands of speculation—the hands of those in debt to banks or brokers, from the hands of fear and doubt and unreasoning action, to the strong hands of investors backed by the dollars which spell buying power. Confidence, courage and conviction have ever brought their own rewards and at this time will prove no exception.

SONGS OF THE SOUTHLAND

The Southern Harmony Four, who have made two successful appearances in Carmel, return to the Denny-Watrous Gallery on July third and fifth. The quartette, assisted by Thelma Brown, "blues" singer, will give a program of negro entertainment—spirituals, "blues" plantation melodies and humorous songs.
